PROFESSIONAL SUMMARY

Motivated and detail-oriented **SOC Analyst** with hands-on experience in network security and cyber threat detection. Proficient in log monitoring, packet analysis using **Wireshark**, network scanning with **Nmap**, and SIEM operations using **Splunk**. Experienced in **Linux** system administration and **SQL**-based data operations. Strong understanding of ISO 27001 and networking protocols. Committed to keeping systems and data safe from cyber threats.

EDUCATION

Sri Sairam Institute of Technology

Bachelor of Engineering – CSE (Cybersecurity) | CGPA: 7.79/10

India

2026 – Present

SKILLS SUMMARY

Languages: Python, C, SQL

Security Tools: Splunk, Wireshark, Nmap, Burp Suite, Kali Linux

Networking: TCP/IP, OSI Model, Firewalls, IDS/IPS

Platforms: Linux (Ubuntu, Kali), Windows

Frameworks: ISO 27001, Risk Management, Incident Response

TECHNICAL EXPERIENCE

Security Operations Center (SOC) – Lab Practice

Cybersecurity Student

2026– Present

- Performed SOC activities including log monitoring, alert analysis, and incident investigation using **Splunk**; created dashboards and real-time alerts for proactive threat detection.
- Analyzed Windows, Linux, and network logs to detect brute-force attacks, suspicious IP activity, and unauthorized access attempts.
- Captured and analyzed network traffic using **Wireshark**; performed host discovery and port scanning with **Nmap** to identify vulnerabilities and abnormal patterns.
- Executed web application vulnerability testing using **Burp Suite** in controlled lab environments.
- Administered **Linux** (Ubuntu/Kali) for permission management, process monitoring, and security configuration; wrote **SQL** queries for structured security data analysis.
- Mapped risks to **ISO 27001** controls and maintained a structured Risk Register using likelihood–impact matrix methodology.

PROJECTS

Risk Register Development & Risk Assessment | *Risk Management, ISO 27001, Excel*

- Built a structured Risk Register to identify, classify, and track organizational security risks using qualitative risk assessment methodology.
- Identified threats (data breaches, insider threats, phishing) and defined mitigation strategies; mapped risks to **ISO 27001** controls with documented treatment plans.

Part Rate Finder & Billing System | *Java, Swing, SQLite, JDBC*

- Developed a desktop GUI application for automated part rate lookup using **HashMap**; integrated **SQLite** via JDBC for persistent storage.
- Used **PreparedStatement** to prevent **SQL injection** and designed structured data logging for search history tracking.

CERTIFICATIONS

- **Ethical Hacking** – Boston Institute of Analytics
- **Data Analytics with Python** – NPTEL

- **Cybersecurity** – Boston Institute of Analytics
- **EX200** – Red Hat Certified System Administrator (RHCSA)
